**New Attack
on Palestinian
National
Resistance**

In late August, the Israeli daily «Haaretz» reported that IDF reservists in the West Bank, spent several days chasing and shooting down children's kites bearing the colors of the Palestinian flag. Eventually the kites were gathered and burned. This seemingly absurd undertaking on the part of the troops of the world's fourth-ranking military power, shows the antagonism and fear with which the Zionists regard any expression of Palestinian national identity.
